## ABOUT ME

26 years old fresh graduate holding a bachelor degree in Management Information System. Data analysis, programming, and web design and development are my fields of interest.

## EDUCATION

-2018

**Yanbu University College**

BSc in Management Information System

## EXPERIENCE

03.2018 - 11.2018

**Zahid tractor & heavy machinery co. ltd**

Worked as a data analyst intern for the first 3 months then as a full time employee on a programming role working on systems like SAP and LotusNotes, I worked with different programming languages there such as JavaScript, LotusScript and Formula.

## PROJECTS

**Invoice generator as my graduation project**

Using Visual Basic I created a software that connects to Microsoft Access Databases and manipulates the data through an interface. The software uses MySQL to search, delete or modify the records inside the Access file.

**JavaFX Point of Sale system**

Fully working JavaFX point of sale system that has features like generating orders, managing inventory, managing receipts, managing users, and creating reports with visual charts.

**My Resume Website [Abdulkreem.com](http://Abdulkreem.com)**

A full coded website made by me using HTML, CSS and JavaScript without the use of any templates or tools. (this resume was made with HTML/CSS)
